FOR IMMEDIATE RELEASE

SIEMENS HEALTHCARE AND CANDELIS ANNOUNCE DISTRIBUTION AGREEMENT FOR IMAGEGRID PACS-RT APPLIANCE AND IMAGEGRID RT VIEWER

Candelis' ImageGrid RT-Viewer speeds access and review of both 2D and 3D images from remote workstations

IRVINE, CA - November 1, 2009 – Today, Candelis, Inc. announced its plans to distribute and sell the ImageGrid™ PACS-RT Appliance and the ImageGrid™ RT Viewer through Siemens Healthcare's Oncology Care Systems Business Unit.

Fully compliant with the DICOM (Digital Imaging and Communications in Medicine) and DICOM-RT standard, ImageGrid PACS-RT substantially accelerates the retrieval and routing speeds of data and images between Radiation Therapy and Oncology facilities and the referring physician.

“ Cutting-edge innovations in Image Guided Radiation Therapy (IGRT) and Intensity Modulated Radiation Therapy (IMRT) have propelled image management, review and treatment approval into the spotlight of oncology care,” said Holger Schmidt, CEO Oncology Care Systems (OCS). “The ImageGrid™ RT-PACS and ImageGrid™ RT Viewer enhance OCS established product offerings to provide oncologists, as well as staff at cancer centers, additional flexibility with immediate access to data and images from any workstation, which in turn enables the realization of the full potential of technologies such as Adaptive Targeting.”

The ImageGrid PACS-RT Appliance also provides a scalable, reliable and highly cost-effective storage solution to accommodate a growing need to archive the large volume of image and data files being generated by high-resolution imaging technology. “This is an innovative solution which has already found considerable success within Radiation Therapy and Oncology and is in use at over 50 cancer centers,” said Alex Razmjoo, CEO, Candelis, Inc. “The ImageGrid™ PACS-RT and ImageGrid™ RT Viewer represent a paradigm shift in radiation therapy image and data archiving and visualization and we are pleased that Siemens will be offering it to its customers.”

About Candelis, Inc.

Based in Irvine, Calif., Candelis is a medical informatics company that develops, manufactures and markets RIS/PACS and PACS-RT appliances, with applications in Radiation Therapy and Oncology, General Radiology and Mammography. The ImageGrid™ product line has been implemented in over 750 hospitals, cancer centers and imaging centers and is currently considered one of the fastest growing RIS/PACS solutions in the world.
