

Distribution of Radiologist Reports with Key Images

Challenges:

- The distribution of images and reports is a time-consuming process that currently involves multiple office staff
- CDs, DVDs, Faxes and emails are not secure and not HIPAA compliant
- Access to actual full-fidelity reports via PACS requires administration of hundreds of referring physician user accounts
- Referring physicians are inconvenienced and frustrated by the imposition of complex connectivity requirements

Solution: ASTRA™ by Candelis

Zero-click Report Distribution via ASTRA™.

- Automatically and securely delivers reports with embedded key images with zero change in radiologist's workflow
- Office staff no longer concerned with faxes, DVDs, CDs or referring physician user accounts
- Physicians can easily forward reports and grant access to specialists
- Provides significant savings to radiology practices
