

Referring Physician Viewing and Universal Access

Challenges:

- Referring physicians need to work with multiple imaging centers
- Forcing referring physicians to interact with multiple PACS systems is impractical
- Administering hundreds of referring physicians accounts can compromise the security of hospital and imaging center network
- Maintaining multiple VPN connections is problematic and costly

Solution: ASTRA™ by Candelis

ASTRA Plus™: Universal Image and Report Viewing

- Universal access irrespective of origination facility
- Referring physicians can view reports embedded with key images from anywhere and at any time.
- Eliminates entirely the need for VPNs
